#### **DETAILED ACTION**

### Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Orson, Sr.

Orson, Sr. discloses a dispensing device comprising all the featured elements of the instant invention, note active gel co. 8, lines 2-37 and wick col. 6, lines 39-68.

3. Claims 1, 3-5 and 7 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Wefler et al.

Wefler et al discloses a dispensing device comprising all the featured elements of the instant invention, note active gel col. 4, line 32 and wick col. 4, lines 54-65.

## Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claims 6 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Orson Sr.

Application/Control Number: 10/738,323

Art Unit: 3752

Orson Sr. discloses all the featured elements of the instant invention, except for the specific mixture of the fragrance and thickener and the gel being an insect repellant. Note in Orson, Sr., col. 8, lines 4-12, where it is disclosed that thickeners can be added. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the mixture claimed, since the percentage of thickener to fragrance would be a matter of design choice depending on the type of thickener used and the desired capillary action desired. As to the active gel being an insect repellant, note, col. 7, line 62 thru col. 8, line 2. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have the active gel be an insect repellant since such a use is well known in the air fragrance dispensing art and such a mixture would perform equally as well in the apparatus of Orson, Sr.

#### Conclusion

- 6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Majerowski et al and Santini disclose wick type diffusion devices.
- 7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steven J. Ganey whose telephone number is (571) 272-4899. The examiner can normally be reached on Monday, Tuesday, Thursday and Friday from 8:00 AM to 5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dave Scherbel, can be reached on (571) 272-4919. The fax phone number for this Group is (703) 872-9306.

Art Unit: 3752

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-1113.
